

Pacific Endocrinology Associates — Pre-Visit Questionnaire

Please complete prior to your endocrinology appointment

Name: Nora Cohen **DOB:** 06/04/1967 **Sex:** F **Phone:** (213) 555-5555

1. Reason for endocrinology referral

Long-standing primary hypothyroidism — recent labs after Levothyroxine dose increase to 112 mcg. Also overdue for bone-density follow-up. Last DEXA Aug-2024 showed lumbar T-score -2.7.

2. Symptoms in the past 8 weeks (check all that apply)

- ☒ Fatigue / low energy
- ☐ Heat intolerance / sweating
- ☒ Cold intolerance
- ☐ Hair thinning
- ☒ Brain fog / poor concentration
- ☐ Palpitations
- ☒ Mid-back pain (since fall 03/2026)
- ☐ Unintended weight loss
- ☐ Tremor
- ☒ Constipation

3. Current medications

Levothyroxine 112 mcg daily (empty stomach), Alendronate 70 mg once weekly, Sertraline 100 mg daily AM, Calcium Carbonate 1200 mg + Vitamin D3 2000 IU daily.

4. Drug / substance allergies

Codeine (severe nausea/vomiting). Shellfish (anaphylaxis 2009, EpiPen used).

5. Family history of endocrine / bone disease

Relation	Condition	Age at event
Mother	Osteoporosis with hip fracture	72 (death 78)
Mother	Hashimoto's thyroiditis	60
Sister	Hyperthyroidism (Graves')	55
Maternal aunt	Vertebral fractures (post-menopausal)	70

6. Lifestyle

Tobacco: never. Alcohol: 2-3 glasses of wine/wk. Exercise: walks 25 min, 4-5 days/wk.
